

Marcos Solé

Front End developer with CI/CD

I am Marcos — a **front-end** developer who finds his **IKIGAI** in the IT world. I want to grow as a **React** top-level developer and reach my best version.

My curiosity makes me a lifelong learner (AI, BackEnd, DevOps...) . With deployed functional **products** and **experience** , I would like to join a team and help turn ideas into effective and useful products.
